Python Developer

2022

self-directed learning

"Advanced-level Python programmer with expertise in Django framework. Proficient in developing robust web applications and solving complex problems. Detail-oriented with a focus on writing efficient and maintainable code."

Web Developer

2022

self-initiated projects

Skilled Web Developer proficient in HTML5, CSS3, JavaScript, jQuery for frontend, and Python, Django, MySQL, REST API for backend. Creates responsive web apps with seamless integration between frontend and backend components.

Graphic Designer

2021-

Reborntek Software House

"Experienced in graphic design and proficient in Adobe Photoshop. Detail-oriented with a focus on quality and meeting deadlines."

Certification

Java and Python

Programmiz software

2022-2023

I earned certificates in Java and Python from Programmiz Software. The Java course covered object-oriented programming and algorithms, while the Python course focused on web development and data analysis. These programs enhanced my programming skills and problem-solving abilities.
